DI

Deal Intelligence

A proprietary commercial real estate acquisition system — six years in development, now fully automated. Designed to identify, analyze, profile, and close owner-financed properties with zero bank dependency.

ACTIVE MARKETS **3 Regions · 8 Deals**	TOTAL TARGET VALUE **$14.1M in Assets**	BANK FINANCING REQUIRED **$0 — All Owner-Carry**
SYSTEM DEVELOPMENT **6 Years Continuous**	PREPARED BY **Jerome Jordan Smith**	PREPARED FOR **Stakeholder Review**

SIX YEARS TO GET HERE

I Didn't Set Out to Build a System. I Set Out to Buy a Gas Station.

I didn't set out to build a real estate technology company. I set out to acquire a cash-flowing property with no money down — specifically, an owner-financed commercial asset where the seller carries the note. That first deal taught me two things that would define the next six years:

First: The intelligence gap between sophisticated buyers and sellers is massive. Sellers with properties sitting unsold for 300+ days are sitting on negotiable deals — they just need the right buyer to frame the right offer. Most buyers never show up because they don't know where to look or how to read the signals.

Second: Almost all of that intelligence is publicly available. County assessor records. State SOS filings. Days-on-market history. Broker license records. Seller psychology patterns embedded in listing language. The raw material exists — what was missing was the system to aggregate and weaponize it.

> *"Every project after that first deal became an experiment. What could I systematize? What could I automate? What could I teach a machine to see that I was spending hours finding manually?"*
>
> — THE CORE QUESTION THAT DROVE SIX YEARS OF ITERATION

Today, Deal Intelligence is that system. It runs a full acquisition pipeline — from raw platform search to a pre-populated Letter of Intent — for any target market, any property type, in under 24 hours. And every deal it closes feeds pattern data back into the system, making the next search faster and the next offer sharper.

THE BUILD TIMELINE

Yr 1–2

Manual Discovery

Built spreadsheets. Learned to read DOM data as a seller motivation signal. Developed the first cold-call framework for 180+ day listings. Success rate improved with each attempt.

Yr 3–4

Templating & Tools

Systematized the research process. Built reusable templates for county assessor lookup, SOS entity research, broker profiling, and seller psychology mapping. Each tool saved hours per deal.

Yr 5–6

AI & Automation

AI changed everything. Multi-agent pipelines replaced manual research. The system now analyzes listings, profiles sellers, generates scripts, maps contact trees, and pre-populates LOIs — automatically.

Now

Deal Intelligence v1.0

Fully operational. 8 active deal files across 3 markets. Complete outreach infrastructure per deal. This briefing is the first formal stakeholder presentation of the system in production.

The Compounding Principle: Every deal closed generates pattern data. Every pattern improves the next search. The system gets smarter with each acquisition — this is a compounding intelligence advantage, not a one-time tool.

THE FIVE-PHASE PIPELINE

From Raw Platform Data to a Signed Letter of Intent.

1

Discovery — Market Scan

Multi-platform search for properties with long days-on-market (180+ days), seller financing signals, and target property types: gas stations, car washes, mobile home parks, flex industrial, restaurants, and multifamily. The system surfaces what motivated sellers look like before anyone calls.

2

Deal Scoring — 100-Point Analysis

Every listing is scored on: DOM weight, price-to-market ratio, financing term signals, seller motivation language, property type quality, and market conditions. Scores rank deals by acquisition priority — the highest scores are the fastest paths to a close.

3

Seller Profiling — Psychological Mapping

We identify the seller's archetype: Retiring Operator, Failed Speculator, Portfolio Exit, Distressed Owner, Completely Exhausted. Each archetype has a distinct pain profile, negotiation posture, and optimal outreach approach. This is the intelligence layer that most buyers never access.

4

Outreach Intelligence — Multi-Channel Scripts

For each deal: a 3-call close sequence (calibrated to seller archetype), email templates, LinkedIn notes, a full stakeholder contact tree (Tier 1 broker → Tier 2 brokerage → Tier 3 seller direct), and a 21-day outreach cadence across all channels. The system knows what to say, to whom, and when.

5

Contractual Framework — LOI Ready

Pre-populated Letter of Intent for each deal: purchase price, down payment, seller note amount, interest rate, amortization, balloon term, monthly payment, and earnest money deposit. Every number is calculated. The deal is ready to put in writing before the first call.

WHAT MAKES THIS DIFFERENT

The Stealth Principle. Every outreach script is calibrated to the seller's exact pain points — but never reveals that we know them. We show up as a humble buyer who happened to find the listing. The intelligence stays internal. The conversation stays disarming.

No Bank Required. Every deal in this system is structured for owner financing. The seller carries the note. The buyer makes monthly payments. No bank approval, no appraisal delays, no conventional financing walls. The deal math works because both sides win.

Scope Without Creep. Traditional research means weeks of manual work. Automation means the full pipeline — discovery through LOI — runs in under 24 hours per market. Scope is no longer a constraint. We analyze everything because we can.

SYSTEM OUTPUT PER DEAL

- ✓ Deal card with 100-point score
- ✓ Money-making plan (3 implementation steps)
- ✓ Seller pain map (archetype + signals)
- ✓ 3-call phone script (stealth buyer voice)
- ✓ Email template + LinkedIn note
- ✓ Stakeholder contact tree (3 tiers)
- ✓ 21-day multi-channel outreach cadence
- ✓ Pre-filled LOI with deal-specific numbers

PROOF OF CONCEPT

Three Markets. Eight Deals. Every One Owner-Finance Ready.

8	3	$14.1M	$0
ACTIVE DEAL FILES	TARGET MARKETS	TOTAL ASSET VALUE	BANK FINANCING NEEDED

#	PROPERTY	MARKET	TYPE	PRICE	DOM	SCORE	FINANCING
01	Twentynine Palms Hotel	High Desert, CA	Hospitality	$6.95M	203	92	Owner Carry
02	Joshua Tree Duplex	High Desert, CA	Multifamily	$629K	215	78	Owner Carry
03	Sands Motel	High Desert, CA	Hospitality	$1.17M	203	71	Negotiable
04	Relax Hotel & Spa	High Desert, CA	Hospitality	Contact	310+	68	Owner Carry
05	Golden Triangle Assemblage	Denver, CO	Land / Dev	$1.11M	518	88	Owner Carry
06	2150 N Broadway Restaurant	Denver, CO	Restaurant	$1.95M	404	95	Confirmed SF
07	Village Drive Flex Industrial	Sonora, CA	Flex / Indus.	$699,950	1,138	65	Negotiable
08	Turn-Key Restaurant US-50	Placerville, CA	Restaurant	$1.30M	602	55	Negotiable

WHAT'S DELIVERED FOR EVERY DEAL

- ✓ Seller archetype identification and pain map
- ✓ 3-call close script in stealth buyer voice
- ✓ Email + LinkedIn templates per deal
- ✓ Stakeholder contact tree (3-tier system)
- ✓ 21-day multi-channel outreach cadence
- ✓ Pre-filled LOI with calculated payment terms

WHY THESE DEALS HAVEN'T CLOSED

- ✓ Average DOM: **437 days** — most buyers gave up
- ✓ Conventional buyers blocked by financing walls
- ✓ No buyer has shown up with the right structure
- ✓ Sellers are exhausted — they need a creative close
- ✓ Deal #06 scores 95/100 — the highest in the system
- ✓ Deal #07 has been listed 3.1 years — maximum leverage

THE OPPORTUNITY

This System Produces What Most Buyers Spend Months Assembling.

Six years of iteration produced something that didn't exist when I started: a fully automated acquisition intelligence system for owner-financed commercial real estate. The 8 deals in this briefing are not hypothetical. They are active, scored, profiled, scripted, and LOI-ready. The only variable remaining is execution — and that's where a partnership becomes the highest-leverage move available.

The question is not whether the deals are real. The question is: **who is positioned to close them?**

OPTION A

Capital Partner

You provide acquisition capital (down payments, earnest money deposits, operating reserves). I deploy the system, execute the outreach, and manage the close. We structure equity participation in each closed deal.

System Licensee

OPTION B

You acquire the right to use Deal Intelligence for your own acquisition pipeline. Full training, ongoing system access, and per-deal consultation. Ideal for active investors who want the infrastructure without building it from scratch.

Strategic Partner

OPTION C

You bring market access, relationships, or operational expertise. I bring the intelligence and deal structuring system. We build a joint pipeline targeting specific markets, property types, or deal sizes aligned with your thesis.

Why Now? The owner-financed CRE market has never been more favorable for buyers willing to structure creatively. Interest rate pressure has motivated sellers who couldn't move assets in 2023–2024. DOM data shows record-level desperation across all target property types. The deals exist. The system to find and close them exists. The window is open.

What I'm asking for is straightforward: **review the enclosed Deal Intelligence Report** (the full 29-page deal analysis), identify the deal or structure that resonates with you, and let's have a conversation. The first deal we close together will demonstrate the system better than any briefing document can.

Ready to Review the Deal Intelligence Report?

The full 29-page report covers every deal in depth: deal cards, money-making plans, seller pain maps, outreach scripts, stakeholder contact trees, and pre-filled LOIs. Everything you need to make a decision is already built.
