DI Deal Intelligence

SIX YEARS IN DEVELOPMENT

The Only Buyer in the Room Who Did the Homework.

A proprietary commercial real estate acquisition system — automated from market scan to signed Letter of Intent. Zero bank dependency. Every deal owner-financed.

$14M IN ASSET VALUE	**$0** BANK FINANCING NEEDED

THE INTELLIGENCE GAP

Most Investors Are Blind to the Best Deals.

The commercial real estate market is full of motivated sellers — they're just invisible to buyers who don't know where to look, what to read, or how to structure the offer.

Days-on-Market Is a Signal, Not a Warning

A property listed 400+ days isn't broken — it hasn't found the right buyer with the right structure. The average DOM across our 8 active deals is 437 days. That's not a red flag. That's leverage.

Bank Financing Walls Out Most Buyers

Restaurant buildings. Raw land. Special purpose properties. Banks routinely decline these. That's not a deal-killer — it's a filter. The buyers who clear it have no competition. We clear it every time.

Seller Psychology Is Publicly Available

DI **Deal Intelligence**

DOM history, price reductions, brokerage patterns, listing language — every motivated seller leaves a signal. Most buyers don't look. We built a system that reads every signal, on every deal, automatically.

THE FIVE-PHASE PIPELINE

From Raw Platform Data to a Signed Letter of Intent.

Every deal runs through the same five-phase pipeline — discovery, scoring, seller profiling, outreach intelligence, and contractual framing — automatically, in under 24 hours.

1

Discovery

Multi-platform scan for motivated seller signals: high DOM, price reductions, seller financing terms, target property types

2

Deal Scoring

100-point scoring model: DOM weight, price-to-market ratio, financing signals, seller motivation language, property quality

3

Seller Profiling

Psychological archetype mapping: Retiring Operator, Failed Speculator, Exhausted Holder, Portfolio Exit, Distressed Owner

4

Outreach Intel

3-call close scripts, email templates, full stakeholder contact tree, 21-day multi-channel cadence — calibrated to archetype

5

LOI Ready

Pre-filled Letter of Intent with deal-specific numbers: price, down, seller note, rate, amortization, balloon, monthly

THE ACTIVE PIPELINE

Eight Deals. Three Markets. Every One Profiled and LOI-Ready.

These aren't hypothetical — they're active listings with analyzed sellers, complete outreach scripts, and pre-populated Letters of Intent ready to send.

Turn-Key

THE INTELLIGENCE LAYER

We Know What the Seller Needs Before We Call.

Every deal comes with a complete psychological profile of the seller. We know their archetype, their pain, and exactly what to say — without ever revealing that we know.

Seller Pain Maps

Archetype identification, pain signal analysis, and a calibrated opening line for every deal — built before the first call is made.

3-Call Close Sequence

Contact & Qualify → Explore & Align → Propose & Structure. A script for each call, each adapted to the seller's specific psychology.

Multi-Channel Outreach

Phone, email, LinkedIn, text, direct-to-seller. A 21-day cadence with channel-specific templates. If the phone doesn't close it, one of these does.

LOI Pre-Populated

Every deal comes with a ready-to-send Letter of Intent with calculated terms. No scrambling after a verbal yes — the paperwork is already done.

What's in Every Deal File

29-page report · 8 complete deal packages

- Deal card with 100-point score
- Money-making implementation plan (3 steps)
- Seller pain map and archetype identification
- 3-call close script (stealth buyer voice)
- Email template + LinkedIn outreach note
- Stakeholder contact tree (3 tiers)
- 21-day multi-channel cadence
- Pre-filled LOI with deal-specific numbers

STEALTH PRINCIPLE

Every script is calibrated to the seller's exact pain points — but never reveals that we know them. We show up as a curious buyer who happened to find the listing. The intelligence stays internal.

THE CREATOR

Six Years of Iteration. One System That Works.

I didn't set out to build a real estate technology system. I set out to buy a cash-flowing property with no money down. That first deal — owner-financed, motivated seller, zero bank involvement — taught me everything I needed to know about where the real opportunity lives.

Every project after that became a laboratory. What could I systematize? What could I automate? What took me 40 hours to research could be done in 40 minutes — if the right tools existed. So I built them.

> *"The scope of what's possible with automation isn't scope creep — it's the whole point. When you can analyze everything from every angle, why wouldn't you? Especially when the decision involves significant capital at risk."*
>
> — ON WHY COMPREHENSIVE ANALYSIS IS NEVER TOO MUCH

Year 1–2

Manual Discovery

Cold calls to 180+ DOM sellers. Spreadsheets. Learning what motivated sellers actually sound like — and what deal structures they respond to.

Year 3–4

Building Reusable Tools

County assessor research templates. Broker profiling workflows. Seller psychology frameworks. Each tool built once, reused on every deal after.

Year 5–6

AI-Powered Automation

Multi-agent pipelines replaced manual research. The entire acquisition workflow — discovery through LOI — now runs automatically for any target market.

Now

Deal Intelligence v1.0

Fully operational. 8 active deal files. 3 markets. The first formal deployment of a system that took six years to build — and gets smarter with every deal closed.

THE OPPORTUNITY

This System Produces What Most Buyers Spend Months Assembling.

Eight deals are ready to pursue right now. The infrastructure is built. The question is: who is positioned to execute?

OPTION A · RECOMMENDED

Capital Partner

You provide acquisition capital — down payments, earnest money, operating reserves. I deploy the system, execute outreach, and manage the close. We structure equity participation in each closed deal.

Let's Structure This →

OPTION B

System Licensee

Acquire the right to use Deal Intelligence for your own acquisition pipeline. Full training, ongoing system access, and per-deal consultation included. Build your own deal flow on proven infrastructure.

Learn More →

OPTION C

Strategic Partner

You bring market access, relationships, or operational expertise. I bring intelligence and deal structuring. We build a joint pipeline targeting specific markets, property types, or deal sizes.

READY TO DEPLOY THIS TOGETHER?

Say Yes to the Deal No One Else Saw.

The 29-page Deal Intelligence Report covers every deal in depth. Review it, pick the one that resonates, and let's talk. The first deal we close together demonstrates the system better than any briefing can.
